

*Field # 4—Never used to my knowledge*

*Field # 1—Rarely used. Seasonal monitoring recommended.*

*Field # 3-- Most easterly, down-sloping section used most years*

*Field # 5—Preferred and used annually*

*Field # 7—Seen by the birds as part of Field # 5. Used by one pair most years.*

*Monitoring recommended.*

*Field # 6—The “picnic table” field. Seen by the birds as part of Field # 7. Used by one pair some years. Monitoring recommended.*

*I think what is called Field # 2 may be a small inset section on the east side of the road that has a different legal ownership status. If it’s the small parcel I’m thinking of, it’s actually part of Field # 5.*

*The small reclaimed field at the end of Malone Road isn’t numbered. Possibly being used this year by birds that were driven off of fields being mowed in the area (second attempt at nesting).*
